### PROFESSIONAL SUMMARY

Resourceful and hands-on Software Engineer with experience in mobile app development using React Native, backend integration using native PHP, and web app development with Laravel. Skilled in building RESTful APIs, managing Linux-based environments, and deploying development servers using Docker. Strong problem-solver with a passion for clean, maintainable code and practical solutions.

### PROFESSIONAL EXPERIENCE

#### Software Engineer

*Pasti Nyala Sdn Bhd, Kuching • July 2024 – Present*

- Developed cross-platform mobile apps using React Native with API integration via PHP Native and MySQL backend.
- Deployed apps to the Google Play Store and iOS App Store, managing versioning and release cycles.
- Built web-based applications using PHP Native and Bootstrap.
- Maintained and modernised legacy PHP systems by updating deprecated code and libraries.
- Set up Docker development environments supporting multiple PHP and MySQL versions on Linux based server.

#### Software Engineer

*SM Digital Innovation Sdn Bhd, Kuching • March 2021 – July 2024*

- Built a native PHP web app to monitor construction progress for a government agency in Sarawak.
- Developed a custom system for Mirecont using Laravel to digitalize construction workflows.
- Developed demo Laravel web apps for project proposals tailored to construction companies.
- Assisted in monitoring and configuring server tower installations at client sites, ensuring proper system setup and network functionality.

#### IT Executive

*Misarma Enterprise Sdn Bhd, Miri • July 2018– March 2021*

- Developed and managed company website using HTML/CSS
- Collaborated with SIGOS GmbH to install and configure active testing and fraud detection servers.
- Built a cross-platform employment app for the oil & gas industry using Flutter.
